

SCHOOL IMPACT ANALYSIS FOR CONCURRENCY PROCESS

Development projects that include residential density are required to submit a "School Impact Analysis (SIA) for Concurrency" form (see attached) along with an application for development approval to the local government. As identified in the Updated Interlocal Agreement for Coordinated Planning and School Concurrency (ILA) Section 11.3a, a local government shall not issue a Certificate of Concurrency (COC) for a residential development until receiving confirmation of available school capacity within the adopted level of service for each school type, in the form of a "School Capacity Availability Determination Letter" (SCADL) from School Board staff. The applicant must also submit a non-refundable application fee made payable to School Board of Charlotte County. Uses exempt from this requirement are identified as follows:

1. All single family lots of record at the time the School Concurrency implementing ordinance becomes effective (March 17, 2009).
2. Any residential development that has a site plan, subdivision plan, preliminary or final plat approval or the functional equivalent for a site specific development order prior to the commencement date of the School Concurrency Program.
3. Any age-restricted community with no permanent residents under the age of eighteen (18). Exemption of an age restricted community must be subject to a restrictive covenant limiting the age of residents to 18 years and older.
4. All new residential development or amendments to previously approved residential development, which are calculated to generate less than one student. Such development shall be subject to payment of school impact fees that may be in effect.
5. All new residential plats and site plans (or functional equivalent), or amendments to previously approved residential development orders, which are calculated to generate less than one student.
6. Development that has been authorized as a Development of Regional Impact pursuant to Chapter 380, F.S., as of July 1, 2005, except that any Notice of Proposed Change, or application of an exchange (equivalency matrix) that increases residential density shall be subject to review for adequate school capacity at the time of plan amendment and school concurrency at the time of subdivision or plat approval.

All other projects must complete the SIA. Once the application for development approval is deemed sufficient by the Local Government, the Local Government will forward the SIA to the School Board of Charlotte County. Upon determination of sufficiency from the Local Government, applicant must submit approved and signed SIA along with a non-refundable application fee to the School Board of Charlotte County for processing and review. The School Board of Charlotte County will begin the review and processing of the request to determine concurrency. Should the submitted information be deemed insufficient by the School Board and/or changes occur after receipt of the information by the School Board, additional fees may be incurred. The concurrency review process may take up to 30 days to complete. A flow chart outlining the school concurrency review process is attached (see attachment A).

Upon the completion of the review process, the School Board of Charlotte County will issue a SCADL directly to the applicant, along with a copy sent to the Local Government. Once the local government has received the SCADL, the Local Government will begin to process the application for development approval.
