

Find an incorrect address on the web?

What to do? When an address is found to be incorrect on the internet and the official Charlotte County records show it correctly, there are several independent companies that update the large mapping websites, like MapQuest. One of these companies is NAVTEQ .

Instructions to correct an address or location:

- ☞ Go to: www.navteq.com
- ☞ Click on “Map Reporter”
- ☞ On the next screen, click on “Find & Report”
- ☞ Type in the address or location, including city & state, and click “Search”
- ☞ Click “Edit Details” then drag and drop the marker on the map to the correct location.
- ☞ Once the location is correct, click on “Yes, submit”.
- ☞ After the location is updated, click on “Next Step>>”, type in any additional information pertaining to your correction or change, along with your e-mail address, and then click “Send Report”.
